PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with hands-on skills in **Docker, Ansible, Jenkins, terraform, Kubernetes**, and cloud platforms like **Azure** and **AWS**. Skilled in building and optimizing CI/CD pipelines to drive automation and efficiency. Strong problem-solving and analytical abilities demonstrated through **competitive programming**. Eager to contribute fresh perspectives and grow in a dynamic tech environment.

SKILLS

Programming Language: C++ | Core Java | Basic Python | C# **Scripting:** Shell | YAML **Version Control System:** Git | GitHub | Gitlab **Containerization:** DOCKER | **Configuration Management:** ANSIBLE | **CI/CD:** JENKINS | **Orchestration:** KUBERNETS **Linux:** Ubuntu | **Subjects:** Operating System | Computer Networks | Data Structure | DBMS | **Cloud :** AWS | Azure

EXPERIENCE

Persistent : *Martian Summer Internship*

June 2023 - Aug 2023

- During this summer internship provided by Persistent, I've completed various courses such as Linux, Data Structures and Algorithms, and Database Management Systems, Core Java.
- Technologies Used:** Linux, DSA, DBMS and Core Java

CodeVertex : Java Developer Intern

- Developed Java applications**, including a Number Guessing Game, Grade Calculator, and ATM Banking System.
- Implemented OOP principles**, ensuring modularity, encapsulation, and scalability in code.
- Enhanced problem-solving skills** by implementing logical algorithms and handling user inputs dynamically.

PROJECTS

Project Name : Employee Management System

Project Description:

Developed an Employee Management System to manage and manipulate employee data through a user-friendly web application. The system supports operations such as adding, modifying, viewing, and deleting employee records, as well as dynamic search, filtering, and data export (CSV/XLS). Integrated with Azure cloud services to host the application and manage storage.

Responsibilities:

- Developed the Employee Management System using ASP.NET Core MVC and Entity Framework Core.
- Designed and implemented SQL Server database tables and CRUD operations for employee records.
- Integrated dynamic search and filter features to query employee data by multiple fields.
- Implemented user authentication and role-based access control to ensure secure access.
- Enabled data export functionality (CSV/XLS) for filtered employee records.
- Utilized Azure Web App for hosting, Azure BLOB Storage for data storage, and Azure Logic App & Function App for data validation and management.
- Implemented error handling and logging mechanisms for system stability and better user experience.

Technologies Used: ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, Azure (Web App, Logic App, Function App, BLOB Storage)

Project Name : Automated Code Delivery: GitHub & GitLab CI/CD Pipelines [Link](#)

Project Description:

Designed and developed an automated CI/CD pipeline for Node.js applications using GitHub Webhooks, GitLab CI/CD, Jenkins, and Docker. The project optimized deployment workflows, reducing deployment time from **2 hours to just 5 minutes (95% improvement)** by automating build, test, and deployment processes.

Responsibilities :

- **Implemented CI/CD pipelines** using Jenkins, GitHub Webhooks and GitLab CI/CD, automating the build, test, and deployment process for Node.js applications.
- **Optimized deployment efficiency** by integrating Docker and configuring runners for GitLab and Jenkins, ensuring faster and reliable releases.
- **Overcame deployment failures** by troubleshooting GitLab runner issues, configuring security settings, and automating Docker authentication via secret variables.
- **Integrated GitHub Webhooks & GitLab Runners**, enabling real-time automatic deployments upon code changes, streamlining DevOps workflows.
- **Reduced deployment time by 95%**, enhancing team productivity and improving code delivery speed.

Technologies & Tools Used: GitHub Webhooks, GitLab CI/CD, Jenkins, Docker, EC2, Docker Compose, Shell Scripting, CI/CD Pipelines

EDUCATION

Bachelor of Technology: Electronics and Telecommunication (9.08 CGPA)
Pimpri Chinchwad College of Engineering, Pune

2020-2024
Maharashtra, India

CERTIFICATIONS

- Introduction to Docker : Authorized by Google Cloud and offered through Coursera
- Fundamentals of Ansible : Authorized by Red Hat and offered through Coursera
- Jenkins-Automating your delivery pipeline : Authorized by Coursera Project Network and offered through Coursera
- Orchestrating the Cloud with Kubernetes (AWS) : Authorized by Google Cloud and offered through Coursera
- Preparing for the AZ-900 Microsoft Azure Fundamentals Exam : Authorized by Microsoft and offered through Coursera
